Agenda

Achieving excellence together

- Welcome and meeting format.
- Academy status
- Curriculum change
- Next meeting

Objective 1

- Continue to increase the rate of progress of learning in all years and particularly in the sixth form by:
 - ensuring students, particularly the most able, are consistently challenged to achieve their full potential
 - embedding target setting and the rigorous monitoring of progress.

- **Objective 2**
- Further improve the quality of teaching and learning so that more is judged outstanding and the vast majority of teaching is judged at least good by:
 - ensuring students have greater opportunities to become independent learners without undue intervention by staff
 - ensuring students have more opportunities to talk about their work and articulate their thinking as precursor to writing
 - ensuring marking consistently informs students how to improve

– **Objective 3**

- Improve the impact of leadership to reduce inconsistencies, so that all middle leaders:
 - have a secure understanding of what constitutes good learning and the skills to support staff to bring about and embed improvements
 - are more rigorous with their evaluations based upon student outcomes

Academy

Achieving excellence together

- Present position
- Timeline
- Opportunities and issues

- New measures and new opportunities
- Languages and humanities
- Vocational courses
- Next steps

Last slide

- Thanks and the next meeting is March 15th.
- Many thanks for your support.
